H, h, 1 ĕch; 2 ăch, *n.* [AITCHES, H's or *Hs*, 1 ĕch'ez; 2 ęch'ĕs, *pl.*] **1.** A letter: the eighth in the English, Latin, and Romanic alphabets. Its sound is technically called a 'glottal fricative,' being produced by the friction of the speech-current against the vocal cords as they tighten in preparation for the utterance of a vowel, or loosen after a vowel has been uttered.

In English initial *h* is silent in many words, as (1) in *heir, honest, honor, hour*; (2) after the letter *r*, as in *catarrh, myrrh, rhapsody, rhetoric, rhubarb*, etc.: (3) when preceded by a vowel, as in *ah! bah! oh!* (4) when medial in certain English proper names, as in *Balham, Chatham, Clapham, Durham*, etc.; and (5) in England, generally when preceded by *w*, as in such words as *while, when, whet, where*, which are uniformly pronounced *wile, wen, wet, wear*. Formerly, the initial *h* of certain other words, as *herb, history, hostler, hospital, humble, humor*, was not pronounced, but the letter has returned to favor and in these words is now pronounced. The modern name ĕch is not a good name, since it does not contain the sound. On the analogy of *c* (sĭ), *g* (jĭ), and *v* (vĭ), *h* might well have been called hĭ. The Latin name is *ha*, > Folk-Latin *acca*, > F. *ache*, > Eng. *ache, aitch*, ĕch. Its German name is *hā*. In the digraphs *ch, gh, sh, th*, the *h* loses its distinctive character, the combination denoting (except *ch* as in *church*) a simple sound.

Syn.: crop, fruit, growth, harvest-feast, harvest-festival, harvest-home, harvesting, harvest-tide, harvest-time, increase, ingathering, proceeds, produce, product; reaping, result, return, yield. *Harvest* is the elegant and literary word; *crop* is the common and commercial expression; we say a man sells his *crop,* but we should not speak of his selling his *harvest;* we speak of an ample or abundant *harvest,* a good *crop. Harvest* is applied almost wholly to grain; *crop* applies to almost anything that is gathered in; we speak of the potato-*crop,* not the potato-*harvest;* we may say either the wheat-*crop* or the wheat-*harvest.* We speak of *produce* collectively, but of a *product* or various *products;* vegetables, fruits, eggs, butter, etc., may be termed farm-*produce,* or the *products* of the farm. *Product* is a word of wider application than *produce;* we speak of the *products* of manufacturing, the *product* obtained by multiplying one number by another, etc. The word *proceeds* is chiefly used of the *return* from an investment; we speak of the *produce* of a farm, but of the *proceeds* of the money invested in farming. The *yield* is what the land gives up to the farmer's demand, the *yield* of corn or oats. *Harvest* has also a figurative use; as, the *result* of lax enforcement of law is a *harvest* of crime. *Harvest, harvest-tide,* and *harvest-time* alike denote the period or season when the crops are or should be gathered (*tide* being simply the old Saxon word for *time*). *Harvest-home* ordinarily denotes the *festival* of *harvest,* and when used to denote simply the season always gives a suggestion of festivity and rejoicing, such as *harvest* and *harvest-time* by themselves do not express. In certain phrases of preference, as **had liefer, had rather, had better, had as lief,** etc., the *had,* early *hadde,* subjunctive preterit, is equivalent to the modern potential, *would have, might have; I had rather die* = I would have death rather; *I had liefer die* = I would have (hold) it, *i. e.,* to die, liefer, dearer. From Anglo-Saxon to Chaucer, *me were liefer die,* to me it would be dearer to die, was the more common idiom: from 1450 to 1550, *I had liefer;* from 1550 onward, *I had rather.* Since Johnson, some grammarians and reformers have urged *I would rather.* In certain expressions, **had have** is improperly used; as, "*Had* I *have* known it." *Had,* used elliptically for *if I had,* itself carries the contingency back into the past, and there is no need of an added *have* to do the same thing. "*Had I known* this," "*Had* he *done* that," are conditional clauses, each complete in itself as expressing past possibility. [< AS. *habban,* have.]

Syn.: be in possession of, be possessed of, hold, occupy, own, possess. *Have* is the most general word, and is applied to whatever belongs to or is connected with one; a man may be said to *have* what is his own, what he has borrowed, what has been entrusted to him, or what he has stolen. To *possess* a thing is to *have* the ownership with control and enjoyment of it. To *hold* is to *have* in one's hand, or securely in one's control; a man *holds* his friend's coat for a moment, or he *holds* a struggling horse; he *holds* a promissory note, or *holds* an office. To *own* is to *have* the right of property in; to *possess* is to *have* that right in actual exercise; to *occupy* is to *have* possession and use with or without ownership. A man *occupies* his own house or a room in a hotel; he may *own* a farm of which he is not in possession because a tenant *occupies* it and is determined to *hold* it. To *be in possession* differs from *possess* in that to *possess* denotes both right and fact, while to *be in possession* denotes simply the fact with no affirmation as to the right. To *have* reason is to be endowed with the faculty; to *be in possesston of* one's reason denotes that the faculty is in actual present exercise.

II. *n.* **1.** A physical agent or form of energy generated by the transformation of some other form of energy, as by combustion, chemical action, or the stoppage of mass-motion by friction. Two forms of heat are recognized: **heat proper,** which is resident in bodies, and **radiant heat,** which is a form of wave-motion occurring in luminiferous ether. It was formerly believed to be caused by the action of a hypothetical material substance, termed **caloric,** but scientific investigation has demonstrated that it is the energy or molecular motion, which varies in direction and degree according as the medium in which it is manifested is solid, fluid, or gaseous. This motion only ceases entirely at the absolute zero-point and can in theory be increased indefinitely. In physics **latent heat** is the amount of heat which a body or mass absorbs while undergoing a change of condition or state, without apparent increase in temperature, as from solid to liquid. Its opposite, **sensible h.,** is represented by the amount of heat absorbed by condensation with increase in temperature. **Specific h.** is the heat required to raise the temperature of a substance one degree as compared as a standard with the heat necessary to raise the same volume of water one degree. [< AS. *hēah,* high.]

Syn.: elevated, eminent, exalted, lofty, noble, proud, steep, tall, towering, uplifted. *Deep,* while an antonym of *high* in usage, may apply to the very same distance simply measured in an opposite direction, *high* applying to vertical distance measured from below upward, and *deep* to vertical distance measured from above downward; as, a *deep* valley nestling between *high* mountains. *High* is a relative term signifying greatly raised above any object, base, or surface, in comparison with what is usual, or with some standard; a table is *high* if it exceeds thirty inches; a hill is not *high* at a hundred feet. That is *tall* whose height is greatly in excess of its breadth or diameter, and whose actual height is great for an object of its kind; as, a *tall* tree; a *tall* man; *tall* grass. That is *lofty* which is imposing or majestic in height; we term a spire *tall* with reference to its altitude, or *lofty* with reference to its majestic appearance. That is *elevated* which is raised somewhat above its surroundings; that is *eminent* which is far above them; as, an *elevated* platform; an *eminent* promontory. In the figurative sense, *elevated* is less than *eminent,* and this less than *exalted;* we speak of *high, lofty,* or *elevated* thoughts, aims, etc., in the good sense, but sometimes of *high* feelings, looks, words, etc., in the invidious sense of haughty or arrogant. A *high* ambition may be merely selfish; a *lofty* ambition is worthy and *noble.* Compare HAUGHTY; STEEP.—Ant.: base, deep, degraded, depressed, dwarfed, inferior, low, mean, short, stunted.

SYN.: account, annals, archives, autobiography, biography, chronicle, memoir, memorial, muniment, narration, narrative, recital, record, register, story. *History* is a systematic record of past events. *Annals* and *chronicles* relate events with little regard to their relative importance, and with complete subserviency to their succession in time. *Annals* (L. *annus*, year) are yearly records; *chronicles* (Gr. *chronos*, time) follow the order of time. Both necessarily lack emphasis, selection, and perspective. *Archives* are public *records*, which may be *annals*, or *chronicles*, or deeds of property, etc. *Memoirs* generally record the lives of individuals or facts pertaining to individual lives. A

biography is distinctively a written *account* of one person's life and actions; an *autobiography* is a *biography* written by the person whose life it records. *Annals, archives, chronicles, biographies,* and *memoirs* and other *records* furnish the materials of *history. History* recounts events with careful attention to their importance, their mutual relations, their causes and consequences, selecting and grouping events on the ground of interest of importance. *History* is usually applied to such an *account* of events affecting communities and nations, yet sometimes we speak of the *history* of a single eminent life. [< AS. *hālig,* < *hāl,* whole.]

Syn.: blessed, consecrated, devoted, divine, hallowed, sacred, saintly, set apart. *Sacred* is applied to that which is to be regarded as inviolable on any account, and so is not restricted to divine things; therefore in its lower applications it is less than *holy.* That which is *sacred* may be made so by institution, decree, or association; that which is *holy* is so by its own nature, possessing intrinsic moral purity, and, in the highest sense, absolute moral perfection. God is *holy;* his commands are *sacred. Holy* may be applied also to that which is *hallowed;* as, "the place whereon thou standest is *holy* ground," *Ex.* iii, 5. In such use *holy* is more than *sacred,* as if the very qualities of a spiritual or divine presence were imparted to the place or object. *Divine* has been used with great looseness, as applying to anything eminent or admirable, in the line either of goodness or of mere power, as to eloquence, music, etc., but there is a commendable tendency to restrict the word to its higher sense, as designating that which belongs to or is worthy of the Divine Being. Compare PERFECT; PURE.—Ant.: abominable, common, cursed, impure, polluted, secular, unconsecrated, unhallowed, unholy, unsanctified, wicked, wordly.

[< AS. *hām,* home]

Syn.: abode, domicil, dwelling, fireside, habitation, hearth, hearthstone, house, ingleside, residence. *Abode, dwelling,* and *habitation* are used with little difference of meaning to denote the place where one habitually lives; *abode* and *habitation* belong to the poetic or elevated style. Even *dwelling* is not used in familiar speech; a person says "my *house,*" "my *home,*" or more formally "my *residence.*" *Home,* from the Anglo-Saxon, denoting originally a *dwelling,* came to mean an endeared *dwelling* as the scene of domestic love and happy and cherished family life, a sense to which there is an increasing tendency to restrict the word—desirably so, since we have other words to denote the mere dwelling-place; we say "The wretched tenement could not be called *home.*" or "The humble cabin was dear to him as the *home* of his childhood." Thus the word comes to signify any place of rest and peace, and especially heaven, as the soul's peaceful and eternal dwelling-place. See HOUSE.

[< L. *honestus*, full of honor, < *honor*, honor.]

Syn.: candid, equitable, fair, faithful, frank, genuine, good, honorable, ingenuous, just, sincere, straightforward, true, trustworthy, trusty, upright. One who is *honest* in the ordinary sense acts or is always disposed to act with careful regard for the rights of others, especially in matters of business or property; one who is *honorable* scrupulously observes the dictates of a personal honor that is higher than any demands of mercantile law or public opinion, and will do nothing unworthy of his own inherent nobility of soul. The *honest* man does not steal, cheat, or defraud; the *honorable* man will not take an unfair advantage that would be allowed him, or will make a sacrifice which no one could require of him, when his own sense of right demands it. One who is *honest* in the highest and fullest sense is scrupulously careful to adhere to all known truth and right even in thought. In this sense *honest* differs from *honorable* as having regard rather to absolute truth and right than to even the highest personal honor. Compare CANDID; JUST; JUSTICE; MORAL; RIGHT; VIRTUOUS.—Ant.: deceitful, dishonest, disingenuous, faithless, false, fraudulent, hypocritical, lying, mendacious, perfidious, traitorous, treacherous, unfaithful, unscrupulous, untrue.

I i Roman. 𝔍 i Black Letter. *I i* Script. I i Revised Scientific

I[1], **i,** 1 ɑi; 2 ī, *n.* [IES, I's, or *Is*, 1 ɑiz; 2 īs, *pl.* **1.** A letter: the ninth in English alphabet. The character comes through the Greek and the Latin and probably ultimately from the Egyptian. It is historically the sign of a high front vowel heard open and short in *it*, close and long in *machine*. In English the letter *i* has the following sound-values: (1) *i* as in "hit"; (2) *ī* as in "police"; (3) ɪ as in "habit", and (4) *ai* as in "aisle," "isle". The *i* of *police* is the highest vowel that can be uttered without consonantal interference. As the final element of a diphthong *i* interchanges freely with *y*, the tendency being to avoid *i* at the end of a word: compare *aisle, oil, boy, moist, oyster.* In the combinations *ai, ay, ei, ey* (*ail, day, veil, they*), the *i* (or *y*) is heard faintly or not at all. In *ui* (*fruit, suit*) it is silent, the *ui* being only a symbol for ū or iū, as the case may be.

What is popularly called "long *i*" is a diphthong of which the first element varies between ɑ, e, and ə. Normally it is nearest to ɑ: wherefore ɑi is used as its symbol in Key 1.

Before *r* in an accented syllable *i* is now generally pronounced ū: compare *fir, thirst.*

The diphthong ɑi is found (1) printed *i*, in strong open syllables, final or before a vowel, as in *ide* (ɑid), *vial* (vɑiəl), etc.; or before a single consonant or mute and liquid, as in *idol, fibrous*, etc.; in strong endings in silent *e*, as in *ice, reconcile, mine, realize, appetite, regicide*, etc.; before silent consonants, as *indict, night, sign*, etc.; before final *ld, mb, nt, st: mild, climb, pint, Christ;* so *ei*, as in *height, sleight*, etc.; so *oi* in *choir.* (2) Printed *y* in *fly* (flɑi), *dyer, hydra, rye, type*, etc.; *ey* in *eye*, etc.; *uy* in *buy.*

The original name of the letter was ī (riming with *bee*), but by the end of the 16th century this sound had been quite generally converted into the diphthong ɑi. The consequence was that the old name was changed to ɑi and the old function assigned to *e.* Lower-case ī was first dotted in the 14th century. I and J have but lately been separated. See J. In the Revised Scientific Alphabet the symbol ɪ is used to indicate the a, e, i, or y of the regular spelling of words when these occur in obscure syllables, as in *palace, senate, renew, valley, visible, ability, city.* See INTRODUCTION. **2.** A symbol noting: (1) As a Roman numeral (either I or ī), one. Repeated, it indicates 2 or 3 units, as the case may be: as, III = 3. Before v, x, l, etc., it signifies minus 1; as, ix = 9. (2) The ninth in a class, order, group, or series; nine as a number or numeral.

-ic, *suffix.* **1.** Used as an adjective termination with general sense 'of,' 'pertaining to,' or 'like,' as in *artistic.* **2.** Used as a termination of nouns, as in *logic.* Some words ending in *-ic* are both adjectives and nouns; as, *public* (this termination was formerly written *-ik, -ike*, or *ick*). Adjectives with the termination *-ikos*, which was very common in Greek, soon came to be used as nouns, either in the singular or in the neuter plural form *-ika*, to express affairs or matters pertaining to some department of life or

knowledge. Sometimes both forms were in use with a distinction of sense: thus *po ītikē* was the art of a statesman, while *politika* meant affairs of state. When adopted into the Romance languages these neuter plurals in *-ika* (through the Latin *-ica*) were used as singular nouns, and through this channel the English language has the forms arithmetic, logic, magic, music, etc. After the 16th century it became customary to use the plural form *-ics* in names of sciences; thus, optics, statics, metaphysics, etc., which words are now construed as singular. In recent times the custom has been introduced from continental Europe of employing a form in *-ic*; thus, dogmatic, metaphysic. A few adjectives in *-ic* form adverbs in *-icly*, as publicly, but the adverb is usually from the secondary form *-ical*. See -ICS; -ICAL. **3.** Used in chemistry, in the names of compounds, to denote a higher valence of the element from which the compound is named than is expressed by the suffix *-ous*; as, nitric acid (HNO_3), nitrous acid (HNO_2). -ics. A suffix, plural in form, but generally singular in sense,

modeled on the Greek neuter plural *-ika*, and denoting an art or a science; as, metaphysics, hydrostatics. [Pl. of -ic.] As between *-ic* and *-ics*, four cases are to be distinguished: (1) When the singular form only is used; as, music. (2) When the plural form only is used as a singular; as, hydrostatics, mathematics. In this group *politics* is sometimes included, but the word is used with a verb in the singular or the plural, according to the point of view of the speaker or writer. (3) When both the singular and plural forms are used in the same sense as the singular; as, esthetic, esthetics, metaphysic, metaphysics. (4) When both the singular and plural forms are used, but in different senses; as, physic, a medicine; physics, a science. Words of this class, in use in England before 1500, had the singular form, but with the 15th century, forms in *-ics*, the French *-iques*, came into use as names of treatises, representing Greek names in *-ika*, Latin *-ica*.

[L., < Gr. *idea*, form, < *idein*, to see.]

Syn.: apprehension, archetype, belief, conceit, concept, conception, design, fancy, fantasy, ideal, image, imagination, impression, judgment, model, notion, opinion, pattern, plan, purpose, sentiment, supposition, theory, thought. *Idea* is in Greek a *form* or an *image*. The word signified in early philosophical use the *archetype* or primal *image* which the Platonic philosophy supposed to be the *model* or *pattern* that existing objects imperfectly embody. This high sense has nearly disappeared from the word *idea*, and has been largely appropriated by *ideal*, but something of the original meaning still appears when in theological or philosophical language we speak of the *ideas* of God. The present popular use of *idea* makes it signify any product of mental *apprehension* or activity, considered as an object of knowledge or thought; this coincides with the primitive sense at but a single point—that an *idea* is mental as opposed to anything substantial or physical; thus, almost any mental product, as a *belief*, *conception*, *design*, *opinion*, etc., may now be called an *idea*. Compare FANCY; IDEAL; IMAGE; THOUGHT.—Ant.: actuality, fact, reality, substance.—**absolute idea.** **1.** In the Platonic sense, the *idea* considered as the archetype of all individual existences. **2.** In the Hegelian sense, the *idea* as the goal and law of all development.

Syn.: fancied, fanciful, imaginary, unreal, visionary. Compare IMAGINARY; ROMANTIC. See also PERFECT. Compare synonyms for IDEAL, *n.*—Ant.: actual, material, palpable, physical, real, substantial, tangible, visible.

i-de'al, *n.* **1.** That which is taken as a standard of excellence or an ultimate object of attainment; model; type. **2.** That which exists only in imagination.

Syn.: archetype, idea, model, original, pattern, prototype, standard. An *ideal* is that which is conceived or taken as the highest type of excellence or ultimate object of attainment. The *archetype* is the primal form, actual or imaginary, according to which any existing thing is constructed; the *prototype* has or has had actual existence; in the derived sense, as in metrology, a *prototype* may not be the original form, but one having equal authority with that as a standard. An *ideal* may be primal, or may be slowly developed even from failures and by negations; an *ideal* is meant to be perfect, the best conceivable thing that could by possibility be attained. The artist's *ideal* is his own mental image, of which his finished work is but an imperfect expression. The *original* is the first specimen, good or bad; the *original* of a master is superior to all copies. The *standard* may be below the *ideal*. The *ideal* is imaginary, and ordinarily unattainable; the *standard* is concrete, and ordinarily attainable, being a measure to which all else of its kind must conform; as, the *standard* of weights and measures, of corn, or of cotton. The *idea* of virtue is the mental concept or image of virtue in general; the *ideal* of virtue is the mental concept or image of virtue in its highest conceivable perfection. Compare EXAMPLE; IDEA.—Ant.: accomplishment, achievement, act, action, attainment, development, doing, embodiment, execution, fact, incarnation, performance, practise, reality, realization.

—**i-de'al-ism,** *n.* **1.** *Philos.* That system of reflective thinking which would interpret and explain the entire universe, things and minds and their relations, as the realization of a system of ideas, or as the progressive evolution of an ideal: opposed to *realism* or *mechanism*. **2.** The quest of the ideal; the habit of forming ideals and of striving after their realization; by extension, that which is so realized; the attainment of an ideal. **3.** *Art.* The endeavor to attain perfection by improving and uniting in one form all the best qualities to be found in different individual forms. *Idealism* creates in conformity with a preconceived ideal; *realism* restricts the imaginative faculty.—**i-de'al-ist,** *n.* **1.** One who idealizes, or seeks an ideal or ideal conditions. **2.** A poetical or romantic person. **3.** One who holds the doctrines of philosophic idealism.—**i-de''al-is'tic,** *a.* Of or pertaining to idealism or the idealists.—**i-de''al-is'ti-cal,** *a.* **i-de''al-is'ti-cal-ly,** *adv.*—**i''de-al'i-ty,** *n.* [-TIES², *pl.*] **1.** The condition or character of being ideal. **i-de'al-ness‡.** **2.** The power or tendency to form ideals.—**i-de''al-i-za'(or-sa')tion,** *n.*—**i-de'al-ize, i-de'al-ise,** *vt. & vi.* [-IZED, -ISED; -IZ''ING; -IS''ING.] To render ideal; beautify; form ideals.—**i-de'al-iz''er, -is''er,** *n.*—**i-de'al-ly,** *adv.* **1.** Conformity to an ideal. **2.** In idea; mentally; intellectually.

Syn.: alike, equivalent, interchangeable, same, selfsame, very same. Strictly, no two persons or things can be *identical* or the *same*. In looser usage, two volumes may be said to be *identical* or the *same* in contents; a carbon copy is *identical* in substance with the original, but is not the *same* document. Two synonyms, as "begin" and "commence," may be in most cases *equivalent* and *interchangeable*, but one is not the *same* as the other, and at some point they will be found to draw apart, either in meaning or use. A check may be *equivalent* to the money specified, but it is not the *same* as cash; hence, the bribe-giver prefers to pay cash, because it cannot be traced like a check. When a person or thing is surely recognized as the very one referred to, and no other, we say, "This is the *identical* man, the *identical* document," or "the *same* man, document," or the like. This is the thought underlying the use of the noun in the phrase "personal *identity*." *Same* is the popular, *identical* the philosophical word, and so more specific and absolute. See SYNONYMOUS.—Ant.: contrary, different, dissimilar, distinct, diverse, other, separate, unlike.

Identity may be of two sorts: **absolute,** which involves exact equality with itself, or selfsameness, as the equation $a = a$; and **relative,** a less rigid sense, which implies a close material resemblance or similarity, as that of the green of two leaves.

id'i-o-cy, 1 id'i-o-si; 2 īd'i-o-çy, *n.* The condition of being an idiot; a state of mental unsoundness amounting almost to total absence of understanding. **id'i-ot-cy‡; id'i-ot-ry‡.**

Syn.: fatuity, folly, foolishness, imbecility, incapacity, senselessness, stupidity. *Idiocy* is a state of mental unsoundness amounting almost or quite to total absence of understanding. *Imbecility* is a condition of mental weakness, which may or may not be as complete as that of *idiocy,* but is at least such as to incapacitate for the serious duties of life. *Incapacity,* or lack of legal qualification for certain acts, necessarily results from *imbecility,* but may also result from other causes, as from insanity or from age, sex, etc.; as, the *incapacity* of a minor to make a contract. *Idiocy* or *imbecility* is weakness of mind, while insanity is disorder or abnormal action of mind. *Folly* and *foolishness* denote a want of mental and often of moral balance. *Fatuity* is sometimes used as equivalent to *idiocy,* but more frequently signifies conceited and excessive *folly. Stupidity* is dullness and slowness of mental action which may range all the way from lack of normal readiness to absolute *imbecility.* Compare INSANITY.—Ant.: acuteness, astuteness, brilliancy, capacity, common sense, intelligence, sagacity, sense, soundness, wisdom.

Syn.: ill-informed, illiterate, uneducated, unenlightened, uninformed, uninstructed, unlearned, unlettered, unskilled, untaught, untutored. *Ignorant* signifies destitute of education or knowledge, or lacking knowledge or information; it is thus a relative term. The most learned man is still *ignorant* of many things; persons are spoken of as *ignorant* who have not the knowledge that has become generally diffused in the world; the *ignorant* savage may be well instructed in matters of the field and the chase, and is thus more properly *untutored* than *ignorant. Illiterate* is without letters and the knowledge that comes through reading. *Unlettered* is similar in meaning to *illiterate,* but less absolute; the *unlettered* man may have acquired the art of reading and writing and some elementary knowledge; the *uneducated* man has never taken any systematic course of mental training. *Ignorance* is relative; *illiteracy* is absolute; we have statistics of *illiteracy;* no statistics of *ignorance* are possible. (2) *Metaph.* Independent or non-relative existence or being.—**im-me'di-ate-ly,** *adv.* **1.** In an immediate manner. (1) Without lapse of time; instantly; at once. (2) Without the intervention of anything; directly. **2.** As soon as: a conjunctival and elliptical use.
Syn.: at once, directly, forthwith, instanter, instantly, now, presently, right away, right off, straightway, this instant, without delay. The strong and general human tendency to procrastination is shown in the progressive weakening of the various words in this group. *Immediately* primarily signifies without the intervention of anything as a medium, hence without the intervention of any, even the briefest, interval or lapse of time. *By and by,* which was once a synonym, has become an antonym of *immediately,* meaning at some (perhaps remote) future time. *Directly,* which once meant with no intervening time, now means after some little while; *presently* no longer means in this very present, but before very long. Even *immediately* is sliding from its instantaneousness, so that we are fain to substitute *at once, instantly,* etc., when we would make promptness emphatic. *Right away* and *right off* are vigorous conversational expressions in the United States.—Ant.: after a while, by and by, hereafter, in the future, some time.

Syn.: bury, dip, douse, duck, immerge, plunge, sink, submerge. *Dip* is Saxon, while *immerse* is Latin for the same initial act; *dip* is accordingly the more popular and commonplace, *immerse* the more elegant and dignified expression in many cases. To speak of baptism by immersion as *dipping* now seems rude, but was entirely proper and usual in early English. Baptists now universally use the word *immerse.* To *dip* and to *immerse* alike signify to *bury* or *submerge* some object in a liquid; but *dip* implies that the object *dipped* is at once removed from the liquid, while *immerse* is wholly silent as to the removal. *Immerse* also suggests more absolute completeness of the action; one may *dip* his sleeve or *dip* a sponge in a liquid, if he but touches the edge; if he *immerses* it, he completely *sinks* it under, and covers it with the liquid. *Submerge* implies that the object can not readily be removed, if at all; as, a *submerged* wreck. To *plunge* is to *immerse* suddenly and violently, for which *douse* and *duck* are colloquia terms. *Dip* is used, also, unlike the other words, to denote the putting of a hollow vessel into a liquid in order to remove a portion of it; in this sense we say *dip up, dip out.* Compare synonyms for BURY.—Prep.: *in.*

Syn.: impending, threatening. *Imminent,* from the Latin, with the sense of projecting over, signifies liable to happen at once, as some calamity, dangerous and close at hand. *Impending,* also from the Latin, with the sense of hanging over, is closely akin to *imminent,* but somewhat less emphatic. *Imminent* is more immediate, *impending* more remote, *threatening* more contingent. An *impending* evil is almost sure to happen at some uncertain time, near or remote; an *imminent* peril is one liable to befall very speedily; a *threatening* peril may be near or remote, but always with hope that it may be averted.—Ant.: chimerical, contingent, doubtful, improbable, problematical, unexpected, unlikely.—**im'mi-nent-ly,** *adv.*

[F., < L. *inductio(n-), in,* in, + *duco,* lead.]

Syn.: deduction, inference. *Deduction* is reasoning from the general to the particular; *induction* is reasoning from the particular to the general. *Deduction* proceeds from a general principle through an admitted instance to a conclusion. *Induction* proceeds from a number of collated instances, through some attribute common to them all, to a general principle. In *deduction,* if the general rule is true, and the special case falls under the rule, the conclusion is certain; *induction* can ordinarily give no more than a probable conclusion, because we can never be sure that we have collated all instances. An *induction* is of the nature of an *inference,* but while an *inference* may be partial and hasty, an *induction* is careful, and aims to be complete. Compare DEMONSTRATION; HYPOTHESIS; INFERENCE.

Syn.: active, assiduous, busy, diligent, employed, engaged, occupied, sedulous. *Industrious* signifies zealously or habitually applying oneself to any work or business. *Busy* applies to an activity which may be temporary, *industrious* to a habit of life. We say a man is *busy* just now; that is, *occupied* at the moment with something that takes his full attention. It would be ridiculous or satirical to say, he is *industrious* just now. But *busy* can be used in the sense of *industrious,* as when we say he is a *busy* man. *Diligent* indicates also a disposition, which is ordinarily habitual, and suggests more of heartiness and volition than *industrious.* We say one is a *diligent,* rather than an *industrious,* reader of the Bible. In the use of the nouns, we speak of plodding *industry,* but not of plodding *diligence.* Compare ACTIVE; BUSY; INDEFATIGABLE; INDUSTRY.

in'dus-try, 1 in'dus-trı; 2 ĭn'dŭs-try, *n.* [-TRIES[z], *pl.*] **1.** Earnest or constant application to work or business. **2.** Useful labor in general. **3.** A special branch of productive work, or the capital or workers employed in it. **4†.** Skill; dexterity; also, a clever device or contrivance. [< L. *industria,* < *industrius,* diligent.]

Syn.: application, assiduity, attention, constancy, diligence, effort, exertion, intentness, labor, pains, patience, perseverance, persistence, sedulousness. *Industry* is the quality, action, or habit of earnest, steady, and continued attention or devotion to any useful or productive work or task, manual or mental. *Assiduity* (L. *ad,* to, and *sedeo,* sit), as the etymology suggests, sits down to a task until it is done. *Diligence* (L. *diligo,* love, choose) invests more effort and exertion, with love of the work or deep interest in its accomplishment; *application* (L. *ad,* to, and *plico,* fold) bends to its work and concentrates all one's powers upon it with utmost intensity; hence, *application* can hardly be as unremitting as *assiduity. Constancy* is a steady devotion of heart and principle. *Patience* works on in spite of annoyances; *perseverance* overcomes hindrances and difficulties; *persistence* strives relentlessly against opposition; *persistence* has very frequently an unfavorable meaning, implying that one persists in spite of considerations that should induce him to desist. *Industry* is *diligence* applied to some vocation, business, or profession; hence, by derived use, the occupation itself. *Labor* and *pains* refer to the *exertions* of the worker and the tax upon him, while *assiduity, perseverance,* etc., refer to his continuance in the work. See BUSINESS.—Ant.: changeableness, fickleness, idleness, inattention, inconstancy, indolence, neglect, negligence, remissness, sloth.

Syn.: absolute, boundless, countless, eternal, illimitable, immeasurable, innumerable, interminable, limitless, measureless, numberless, unbounded, unconditioned, unfathomable, unlimited, unmeasured. *Infinite* (L. *in,* not, and *finis,* limit) signifies without bounds or limits in any way, and may be applied to space, time, quantity, or number. *Countless, innumerable,* and *numberless,* which should be the same as *infinite,* are in common usage vaguely employed to denote what it is difficult or practically impossible to count or number, but still perhaps falling far short of *infinite;* as, *countless* leaves, the *countless* sands on the seashore, *numberless* battles, *innumerable* delays. So, too, *boundless, illimitable, limitless, measureless,* and *unlimited* are loosely used in reference to what has no apparent or readily determinable limits in space or time; as, we speak of the *boundless* ocean. *Infinite* space is without bounds, not only in fact, but in thought; *infinite* time is truly *eternal.* Compare ETERNAL; PERFECT.—Ant.: bounded, brief, circumscribed, evanescent, finite, limited, little, measurable, moderate, narrow, restricted, shallow, short, small, transient, transitory.

in-her'ent, 1 in-hīr'ənt; 2 ĭn-hēr'ent, *a.* **1.** Permanently united; intrinsic; innate; essential. **2.** Pertaining as a property or attribute.

Syn.: congenital, essential, immanent, inborn, inbred, indispensable, indwelling, infixed, ingrained, inhering, innate, inseparable, internal, intrinsic, inwrought, native, natural, subjective. *Immanent* is a philosophic word, to denote that which dwells in or pervades any substance or spirit without necessarily being a part of it, and without reference to any working out (compare SUBJECTIVE). That which is *inherent* is an *inseparable* part of that in which it inheres, and is usually thought of with reference to some outworking or effect; as, an *inherent* difficulty. God is said to be *immanent* (not *inherent*) in the universe. Fre-

quently *intrinsic* and *inherent* can be interchanged, but *inherent* applies to qualities, while *intrinsic* applies to essence, so that to speak of *intrinsic* excellence conveys higher praise than if we say *inherent* excellence. *Inherent* and *intrinsic* may be said of persons or things; *congenital, inborn, inbred, innate,* apply to living beings. *Congenital* is frequent in medical and legal use with special application to defects; as, *congenital* idiocy. *Innate* and *inborn* are almost identical, but *innate* is preferred in philosophic use, as when we speak of *innate* ideas; that which is *inborn, congenital,* or *innate* may be original with the individual, but that which is *inbred* is inherited. *Ingrained* signifies dyed in the grain, and denotes that which is deeply wrought into substance or character. See NATURAL.—Ant.: accidental, casual, external, extrinsic, fortuitous, incidental, outward, subsidiary, superadded, superficial, superfluous, superimposed, supplemental, transient, unconnected.

Syn.: blemish, damage, detriment, disadvantage, evil, harm, hurt, impairment, injustice, loss, mischief, outrage, prejudice, wrong. *Injury* is the general term including all the rest. Whatever reduces the value, utility, beauty, or desirableness of anything is an *injury* to that thing; of persons, whatever is so done as to operate adversely to one in his person, rights, property, or reputation is an *injury. Damage* (L. *damnum,* loss) is that which occasions *loss* to the possessor; hence, any impairment of value, often with the suggestion of fault on the part of the one causing it; *damage* reduces value, utility, or beauty; *detriment* (L. *deterere,* to rub or wear away) is similar in meaning, but far milder. *Detriment* may affect value only; *damage* always affects real worth or utility; as a rule, the slightest use of an article by a purchaser operates to its *detriment* if again offered for sale, even when the article may not have received the slightest *damage. Damage* is partial; *loss* is properly absolute as far as it is predicated at all; the *loss* of a ship implies that it is gone beyond recovery; the *loss* of the rudder is a *damage* to the ship; but since the *loss* of a part still leaves a part, we may speak of a partial or a total *loss. Evil* commonly suggests suffering or sin, or both; as, the *evils* of poverty, the social *evil. Harm* is closely synonymous with *injury;* it may apply to body, mind, or estate, but always affects real worth, while *injury* may concern only estimated value. A *hurt* is an *injury* that causes pain, physical or mental; a slight *hurt* may be no real *harm. Mischief* is disarrangement, trouble, or *harm* usually caused by some voluntary agent, with or without injurious intent; a child's thoughtless sport may do great *mischief; wrong* is *harm* done with evil intent. An *outrage* combines insult and *injury.* Compare synonyms for BLEMISH; CRIMINAL; INJUSTICE; LOSS; OUTRAGE; VIOLENCE.—Ant.: advantage, amelioration, benefit, blessing, boon, help, improvement, remedy, service, utility.—Prep.: injury *of* or *to* a person or thing; injury *by* fire: *by* or *from* collision, interference, etc.

in-jus'tice, 1 in-jus'tis; 2 ĭn-jŭs'tic, *n.* **1.** The violation or denial of justice. **2.** An unjust act; a wrong.

Syn.: grievance, iniquity, injury, unfairness, unrighteousness, wrong. *Injustice* is a violation or denial of justice, an act or omission that is contrary to equity or justice: as, the *injustice* of unequal taxes. In legal usage a *wrong* involves *injury* to person, property, or reputation, as the result of evil intent; *injustice* applies to civil damage or loss, not necessarily involving *injury* to person or property, as by misrepresentation of goods which does not amount to a legal warranty. In popular usage, *injustice*

may involve no direct *injury* to person, property, interest, or character, and no harmful intent, while *wrong* always involves both; one who attributes another's truly generous act to a selfish motive does him an *injustice*. *Iniquity*, in the original sense, is a want of or a deviation from equity; but it is now applied in the widest sense to any form of ill-doing. Compare synonyms for CRIMINAL; INJURY; SIN.—Ant.: equity, fairness, fair play, faithfulness, honesty, honor, impartiality, integrity, justice, lawfulness, rectitude, right, righteousness, uprightness.

A little child or a lamb is *innocent;* a tried and faithful man is *righteous*, *upright*, *virtuous*. *Immaculate*, *pure*, and *sinless* may be used either of one who has never known the possibility of evil or of one who has perfectly and triumphantly resisted it. *Innocent* is used of inanimate substances in the sense of *harmless;* as, an *innocent* remedy, that is, one not dangerous, even if not helpful. *Innocent*, in a specific case, signifies free from the guilt of a particular act, even when the total character may be very evil; as, the thief was found to be *innocent* of the murder. Syn.: ask, examine, interrogate, query, question. To *ask* is to use some form of speech, short of direct command, for obtaining something from another. *Ask* has thus two distinct uses: (*a*) that which is *asked* may be some benefit, favor, help, relief, etc. Such *asking* is commonly not in the form of a question; as, "Please help me." (See synonyms for ASK); (*b*) that which is *asked* may be information, in which case the words ordinarily take the form of a question; in this latter sense *ask* is a synonym for *inquire*, etc. One may either *ask* or *inquire* one's way. In this sense *ask* and *inquire* are nearly interchangeable, chiefly differing in the fact that *ask* is the popular and *inquire* the more formal word, while *ask* has place in the best literary use. Also, *ask* has more reference to the presence of a second person; the solitary investigator rather than *asks* the cause of some phenomenon; in this sense *ask* is often used reflexively; as, "I *asked myself* why this happened." *Inquire into* thus becomes a natural synonym for *examine, investigate*, etc. Compare ASK; EXAMINE; QUESTION, *v.* & *n.*—Prep.: inquire *into* any matter demanding investigation; *about, concerning, or in regard to* the transaction; inquire *of* one who can give information; inquire *at* a house *for* a person or thing; *after* one's health; inquire *out* items or individuals from a mass or aggregate.—**in-quir'a-bl**(e, *a.*—**in-quir'er,** *n.*—**in-quir'ing,** *pa.* **-ly,** *adv.*

Syn.: curious, inquiring, intrusive, meddlesome, meddling, peeping, prying, scrutinizing, searching. An *inquisitive* person is one who is bent on finding out all that can be found out by inquiry, especially of little and personal matters, and hence is generally *meddlesome* and *prying*. *Inquisitive* may be used in a good sense, but in such connection *inquiring* is to be preferred;

as, an *inquiring* mind. As applied to a state of mind, *curious* denotes a keen and rather pleasurable desire to know fully something to which one's attention has been called, but without the active tendency that *inquisitive* implies; a well-bred person may be *curious* to know, but will not be *inquisitive* in trying to ascertain what is of interest in the affairs of another.—Ant.: apathetic, careless, heedless, inattentive, indifferent, unconcerned, uninterested.—Prep.: inquisitive *about, concerning, in regard to, regarding* trifles.

Compare synonyms for INSANITY.—Ant.: clear, collected, level-headed, sage, sane, sensible, sober, sound, wise.—**in-sane'ly,** *adv.*

The principal forms are *delusional insanity, dementia, mania, melancholia,* and *paranoia.* **2.** *Law.* A deranged mental condition such as deprives a person of the capacity to comprehend the nature and consequences of a particular act. **3.** Lack of sound sense; extreme folly. **in-sane'ness‡; in-sa'ni•ty.**

Syn.: aberration, alienation, craziness, delirium, dementia, derangement, frenzy, hallucination, lunacy, madness, mania, monomania. Of these terms *insanity* is the most exact and comprehensive, including in its widest sense all morbid conditions of mind due to diseased action of the brain or nervous system. *Craziness* is a vague popular term for any sort of disordered mental action, or for conduct suggesting it. *Lunacy* originally denoted intermittent *insanity,* supposed to be dependent on the changes of the moon (L. *luna*): the term is now applied in general and legal use to any form of mental unsoundness except idiocy. *Madness* is the old popular term, now less common, for *insanity* in its widest sense, but with suggestion of excitement, akin to *mania.* In the derived sense, *lunacy* denotes what is insanely foolish, *madness* what is insanely desperate. *Derangement* is a common euphemism for *insanity. Delirium* is always temporary, and is specifically the *insanity* of disease, as in acute fevers. *Dementia* is a general weakening of the mental powers: the word is specifically applied to senile *insanity,* dotage. *Aberration* is eccentricity of mental action due to an abnormal state of the perceptive faculties, and is manifested by error in perceptions and rambling thought. *Hallucination* is the apparent perception of that which does not exist or is not present to the senses, as the seeing of specters or of reptiles in delirium tremens. *Monomania* is mental *derangement* as to one subject or object. *Frenzy* and *mania* are forms of raving and furious *insanity.* Compare DELUSION; FRENZY; IDIOCY.—Ant.: clearness, good sense, lucidity, rationality, sanity.

Syn.: in, to. *Into* is the preposition of tendency, direction, destination, etc.: *in* is that of condition, state, position or situation. *Into* should be used and not *in*, when entrance or insertion is intended; *into* indicates motion, change, entrance, in a more marked degree than *in*. "I throw the stone *into* the water, and it lies *in* the water." It is not uncommon to find such misuse even by reputable writers; as, "I divide these pleasures *in* (for *into*) two kinds"; "To keep stragglers *into* (for *in*) line." Used adverbially *in* follows verbs of motion, as *come, go, walk*, and such use has established certain phrases as idioms. One says, "Come *in* the house" but the proper expression is "Come *into* the house." Where no object is expressed, we say "come *in*," "go *in*." Faith, confidence, trust, and the like, are viewed as reaching from the one exercising them, and resting *in* the one toward whom they are exercised. Hence we speak of putting confidence *in* one.—Ant.: away from, beyond, by, from, out, out of, past, through.

As regards logical connection that which is *included* is usually expressly stated; that which is *implied* is not stated, but is naturally to be inferred; that which is *involved* is necessarily to be inferred; as, a slate roof is *included* in the contract; that the roof shall be water-tight is *implied;* the contrary supposition *involves* an absurdity. Syn.: equity, fairness, fair play, faithfulness, honor, impartiality, integrity, justness, law, lawfulness, legality, rectitude, right, righteousness, rightfulness, truth, uprightness, virtue. In its governmental relations, human or divine, *justice* is the giving to every person exactly what he deserves, not necessarily involving any consideration of what any other may deserve; *equity* (the quality of being equal) is giving every one as much advantage, privilege, or consideration as is given to any other; it is that which is equally right or just to all concerned; *equity* is equal *justice* and is thus a close synonym for *fairness* and *impartiality,* but it has a philosophical and legal precision that those words have not. In legal proceedings, the system of *equity,* devised to supply the insufficiencies of *law,* deals with cases "to which the *law* by reason of its universality can not apply." In personal and social relations *justice* is the rendering to every one what is due or merited, whether in act, word, or thought: in matters of reasoning, or literary work of any kind, *justice* is close, faithful, unprejudiced, and unbiased adherence to essential truth or fact; we speak of the *justice* of a statement, or of doing *justice* to a subject. *Integrity, rectitude, right, righteousness,* and *virtue* denote conformity of personal conduct to the moral law, and thus necessarily include *justice,* which is giving others that which is their due. *Lawfulness* is an ambiguous word, meaning in its narrower sense mere *legality,* which may be very far from justice, but in its higher sense signifying accordance with the supreme *law* or *right,* and thus including perfect *justice. Justness* refers rather to logical relations than to practical matters; as, we speak of the *justness* of a statement or of a criticism. See JUDGE; VIRTUE.—Ant.: dishonesty, inequity, injustice, partiality, unfairness, unlawfulness, unreasonableness, untruth, wrong.

Such terms as *knight banneret*, *knight baronet*, *knight companion*, and *knight templar* are each two nouns in apposition. In the plural each word takes the inflection; as, *knights templars*, etc. In *knight errant* the second word is an adjective, and the term means "errant knight." A few such English terms follow the French idiom in placing the adjective after the noun, but not the French practise of pluralizing the adjective; as, *knights errant*, *laws merchant*, *bodies politic*. Some terms of these kinds have been often erroneously treated as compounds, *knight-errant* being particularly frequent in print. They are not compounds, the adjective properly qualifying its noun as a separate word, and apposition of two nouns having a similar effect as to relative force, but attributing a named office, rank, or the like, instead of quality or character.

Either *know* or *know of* is correct, but they mean different things. I *know* my friend; I may *know of* a stranger whom I have never met. See LEARN. Syn.: acute, astute, clever, cunning, discerning, intelligent, keen, penetrating, sagacious, sharp, shrewd. A *knowing* look, air, etc., indicates practical knowledge with a touch of shrewdness, and perhaps of cunning; in regard to some special matter, it indicates the possession of reserved knowledge which the person could impart if he chose. *Knowing* has often a slightly invidious sense. We speak of a *knowing* rascal, meaning *cunning* or *shrewd* within a narrow range, but of a *knowing* horse or dog, in the sense of *sagacious*, implying that he knows more than is commonly expected of such an animal. A *knowing* child has more knowledge than would be looked for at his years, perhaps more than is quite desirable, while to speak of a child as *intelligent* is altogether complimentary. See ASTUTE; CLEVER; INTELLIGENT; WISE.—Ant.: dull, gullible, senseless, silly, simple, stolid, stupid, undiscerning, unintelligent.—**know'ing-ly**, *adv.* **1.** With knowledge. **2.** Shrewdly; slyly.—**know'ing-ness**, *n.*

Syn.: acquaintance, apprehension, cognition, cognizance, comprehension, erudition, experience, information, intelligence, intuition, learning, light, lore, perception, recognition, scholarship, science, wisdom. *Knowledge* is all that the mind knows, from whatever source derived or obtained, or by whatever process; the aggregate facts, truths, or principles acquired or retained by the mind, including alike the *intuitions* native to the mind and all that has been learned respecting phenomena, causes, laws, principles, literature, etc. There is a tendency to regard *knowledge* as accurate and systematic, and to a certain degree complete. We say of a studious man that he has a great store of *knowledge*, or of an intelligent man of the world, that he has a fund of varied *information*. We speak of *perception* of external objects, *apprehension* of intellectual truth. Simple *perception* gives a limited *knowledge* of external objects, merely as such; the *cognition* of the same objects is a *knowledge* of them in some relation; *cognizance* is the formal or official *recognition* of something as an object of *knowledge;* we take *cognizance* of it. *Intuition* is primary *knowledge* antecedent to all teaching or reasoning; *experience* is *knowledge* that has entered directly into one's own life; as, a child's *experience* that fire will burn. L[1], **l,** 1 el; 2 ĕl, *n.* [ELS, L's, or *Ls*, 1 elz; 2 ĕls, *pl.*] **1.** A letter: the twelfth in the English alphabet. Like *r*, *l* is often called a "liquid." In English the sound of this letter is one of the most uniform and changeless of the sounds in the language, easily prolonged so as to constitute a syllable. It combines freely with other sounds (as, *late*, *lever*, *live*, *love*, etc.), and while silent in a certain number of words (as, *could*, *should*, and *would*), in combination with *a*, it strengthens the *a* (as, *alms*, *balm*, *calm*, *balk*, *talk*, *walk*, etc.). Formerly silent in *holm*, it is now indicated as pronounced, yet in *folk* it still remains silent.

Capital L is from Latin L, < Early Gr. and L., < Phenician, < Egyptian hieratic, < hieroglyphic. The Egyptian hieroglyph represented a lioness, the Phenician letter was called *lamed*, ox-goad, > the Greek *lambda;* the Anglo-Saxon futhorc has the name *lagu*, lake, the 21st letter. [< AS. *length,* < *lang,* long.]—**at length.** **1.** After an interval of expectation; finally; at last. **2.** At full length; without omission or contraction. SYN.: at last. The two prepositional phrases *at last* and *at length* are quite distinct in meaning and are not, in strict usage, interchangeable. The assumption that *at length* means the same as *at last,* and is therefore superfluous, is an error. Both *at length* and *at last* presuppose long waiting; but *at last* views what comes after the waiting as a *finality; at length* views it as *intermediate* with reference to action or state that continues, or to results that are yet to follow; as, "I have invited him often, and *at length* he is coming"; "I have invited him often, and *at last* he has come"; "*At length* he began to recover;" "*At last* he died." "*At last* he concluded" is correct, but "*At last* he began" would seem somewhat grotesque. The distinction appears clearly in the two following quotations from Milton: "Scarce thus *at length* failed speech recovered sad." *P. L.* bk. iv, l. 357. "O, then, *at last* relent." *P. L.* bk. iv, l. 79. —**length'wise,** *adv.* In a longitudinal direction. **length'-ways†.**—**length'y,** *a.* [LENGTH'I-ER; LENGTH'I-EST.] **1.** Having length; unduly long. **2.** [U. SYN.: emancipation, freedom, independence, license. In general terms, it may be said that *freedom* is absolute, *liberty* relative; *freedom* is the absence of restraint, *liberty* is the removal or avoidance of restraint. The two words are constantly interchanged; the slave is set at *liberty,* or gains his *freedom;* but *freedom* is the nobler word. *Independence* is said of states or nations, *freedom* and *liberty* of individuals; the *independence* of the United States did not secure *liberty* or *freedom* to its slaves. *Liberty* keeps quite strictly to the thought of being clear from restraint or compulsion; *freedom* takes a wider range, applying to other oppressive influences; thus, we speak of *freedom* from annoyance or intrusion. See PERMISSION. *License* is, in its limited sense, a permission or privilege granted by adequate authority, a bounded *liberty;* in the wider sense, *license* is an ignoring and defiance of all that should restrain, and a reckless doing of all that individual caprice or passion may choose to do —a base and dangerous counterfeit of *freedom.* See PERMISSION; RIGHT.—ANT.: captivity, compulsion, constraint, imprisonment, necessity, obligation, oppression, serfdom, servitude, slavery, superstition.

The derived meanings of these words are very many. A picture, a statue, a poem, an actor's rendering of his part may be spoken of as *lifeless*, or less frequently as *inanimate*; we speak of a *dead* book, *dead* capital, a *dead* wall, and even of a *dead* (that is, a dull or non-resonant) sound. *Deceased* is in formal and approved use as a euphemism for *dead*; *defunct* is now somewhat contemptuous or opprobrious; as, a *defunct* author, *defunct* mythologies. *Extinct* implies cessation of vitality or force; as, an *extinct* volcano. So the logarithm of 100,000 is 5 because 10 increased to the fifth power is 100,000—$10 \times 1000 = 10^5$.

2. In a former and broader sense, one of any series of numbers whose members correspond, each to each, with the natural numbers, but are in arithmetical progression when the latter are in geometrical, so that, if the products of two sets of numbers are equal, the sums of the corresponding logarithms are also equal.

Logarithms in the modern sense of def. 1 have also the property described in def. 2, but are limited by the requirement that, whatever the base may be, the logarithm of 1 must be 0, so that processes of addition and subtraction of the logarithms correspond to multiplication and division of natural numbers. The **arithmetical complement of a logarithm** is the difference between the logarithm and 10, which is the base in the decimal logarithms of Briggs. See also ANTILOGARITHM. Tables of logarithms are much used to abridge computation. Thus, when two large numbers are to be multiplied, their logarithms are found in the table and added. The sum is the logarithm of the product sought. [< Gr. *logos* (< *legō*, select) + *arithmos*, number.]—**log"a-rith'mic,** *a.* **log"a-rith'mi-cal‡.**

[< AS. *lufian,* love.]

Syn.: like. Altho their distinction in meaning is one of the peculiar felicities of the English language, *love* and *like* are often confounded in use. We *love* that which ministers to our affections: we *like* what ministers to appetite, taste, fancy, etc. A *man loves* his wife and children; he *likes* roast beef; he *likes* some good-natured acquaintance whom he could not be said to *love,* except as he should *love* all men; he *likes* a fast boat, a fine house, a pleasing picture, a brisk walk, a chat with friends, a ride through the country, etc. See ADMIRE; LIKE. Compare LOVE, *n.*—**lov'er,** *n.* **1.** One who loves; a warm admirer; devoted friend. **2.** One who is in love: in the singular now used only of the man. **3.** One who enjoys or is strongly attracted by some object or diversion. **4.** One who loves illicitly.—**lov'er-ly,** *a.* Like a lover.

[< AS. *lufe,* < *lufian,* love.]

Syn.: affection, attachment, attraction, charity, devotion, esteem, feeling, fondness, friendship, liking, passion, regard, tenderness. *Affection* is kindly feeling, deep, tender, and constant, going out to some person or object, being less fervent and ardent than *love. Love* is the yearning or outgoing of soul toward something that is regarded as excellent, beautiful, or desirable; *love* may be briefly defined as strong and absorbing *affection* for and *attraction* toward a person or object. *Love* may denote the subtlest and holiest spiritual *affection,* as when we are taught that "God is *love." Charity* has so far swung aside from this original meaning that probably it never can be recalled (compare BENEVOLENCE). The Revised Version uses *love* in place of *charity* in 1 *Cor.* xiii, and elsewhere. *Love* is more intense, absorbing, and tender than *friendship,* more intense, impulsive, and perhaps passionate than *affection;* we speak of fervent *love,* but of deep or tender *affection,* or of close, firm, strong *friendship. Love* is used specifically for personal *affection* between the sexes, in the highest sense, the *love* that normally leads to marriage, and subsists throughout all happy wedded life. *Love* can never properly denote mere animal passion, which is expressed by such words as appetite, desire, lust. One may properly be said to have *love* for animals, for inanimate objects, or for abstract qualities that enlist the affections, as we speak of *love* for a horse or a dog, for mountains, woods, ocean, or of *love* of nature, and *love* of virtue. *Love* of articles of food is better expressed by *liking,* as *love,* in its full sense, denotes something spiritual and reciprocal, such as can have no place in connection with objects that minister merely to the senses. See ATTACHMENT; FRIENDSHIP.—Ant.: see synonyms for ANTIPATHY; ENMITY; HATRED.—Prep.: *love of* country, *for* humanity; love *to* God and man.
